Savor the knowledge: unleashing the power of gentle, fast, and easy cell sorting

Lunch and learn brought to you by Miltenyi Biotec and hosted by the UT Health San Antonio Flow Cytometry Core

Tuesday, July 18, 2023 | 12:00 p.m. – 1:00 p.m. (CDT)
UT Health San Antonio (ALTC 3.301), 7703 Floyd Curl Drive, San Antonio, TX 78229

While working with cells can be difficult, some types pose more of a challenge than others. Current cell isolation methods can be extremely harsh and result in poor sample quality and recovery for downstream applications.

At this lunch and learn, your local Miltenyi Biotec Flow Cytometry Specialist Matt Riddle will discuss the power of the MACSQuant® Tyto® Cell Sorter to isolate cells gently, quickly, and easily.

We're packing a lot of information into this one-hour meeting and will explore the following topics:

- Brain cells
- Tumor cells
- Nuclei sorting
- Bacteria sorting
- Sorting induced pluripotent stem cells (iPSCs)
- Rare and fragile cells
